Team repositories are hosted on NC State’s GitHub.

You give yourself access through the SDC System dashboard.

Teaching staff and sponsors have read access.
Utilizing the team repositories allows the teaching staff to

• stay up-to-date on your progress
• gain insight into individual contributions
• easily archive and hand off project data.

*Use of the repository we created for you is mandatory!*

As a project drags on, my git commit messages get less and less informative.
Short summary in ~50 characters or fewer

More detailed explanatory text, if necessary. Explain the problem that this commit is solving. Focus on *why* you are making this change as opposed to *how* (the code explains that). Are there side effects or other unintuitive consequences of this change? Here's the place to explain them.

- Bullet points are okay, too
- Use hyphens or asterisks

Put references to issues at the bottom, like this:

Fixes #123
